AMERICAN DICTIONARY

OF

THE ENGLISH LANGUAGE.

A is the first letter of the alphabet in most of the known languages of the earth, in the Ethiopic, however, it is the *thirteenth*, and in the Runic, the *tenth*. It is naturally the first letter, because it represents the first vocal sound naturally formed by the human organs, being the sound uttered with a mere opening of the mouth without constraint, and without any effort to alter the natural position or configuration of the lips. Hence this letter is found in many words first uttered by infants, which words are the names of the objects with which infants are first concerned, as the breast, and the parent. Hence in Hebrew ם‌א *am*, a mother, and ב‌א *ab*, is father. In Chaldee and Syriac, *abba* is father, in Arabic, *abu*, in Ethiopic, *abi*, in Malayan and Bengalese, *bappa*, in Welsh, *tad*, whence we retain *dad*, in Old Greek and in Gothic, *atta*, in Irish, *athair*, in Cantabrian, *aita*, in Lapponic, *atki*, in Abyssinian, *abba*, in Amharic, *abo*, in Shilhic and Melindane, African dialects, *baba* and *papa* is found in many nations. Hence the Latin *mamma*, the breast, which is, in popular use, the name of mother, in Swedish, *amma* is a nurse. This list might be greatly extended, but these examples prove A to be the first natural vocal sound, and entitled to the first place in alphabets. The Hebrew name of this letter, *aleph*, signifies an *ox* or a *leader*.

A has, in English, four sounds, the long or slender, as in *place*, *fate*; the broad, as in *wall*, *fall*, which is shortened in *squad*, *what*; the open, or Italian, as in *father*, which is shortened in *china*; and the short sound, as in *fat*. Its primitive sound was probably *aw*. A is also an abbreviation of the Saxon *an* or *ane*, *one*, used before words beginning with an aspiration, as, *a* table, instead of *an* table, or one table. This is a modern change, for in Saxon *an* was used before consonants as well as vowels, as, *an tid*, a time, *an gear*, a year. [See AN.]

This letter serves as a prefix to many English words, as in *asleep*, *awake*, *afoot*, *aground*, *agoing*. In some cases, this is a contraction of the Teutonic *ge*, as in *a-leep*; *aware*, from the Saxon *ge-dapan*, to sleep, *gewarian*, to beware, the Dutch *gewaar*. Sometimes it is a corruption of the Saxon *on*, as, *agast*, from *ongeest*; *awake*, from *oncwacian*, to watch or wake. Before participles, it may be a contraction of the Celtic *ag*, the sign of the participle of the present tense, as, *ag-rack*, saying; *a-saying*, *a-going*. Or this may be a contraction of *an*, or, what is equally probable, it may have proceeded from a mere accidental sound produced by negligent utterance. In some words, *a* may be a contraction of *at*, *of*, *in*, *to*, or *an*. In some words of Greek original, *a* is privative, giving to them a negative sense, as in *anonymous*, from *a* and *ονομα*, *name*.

Among the ancients, A was a numeral, denoting 500, and with a dash, $\bar{A}$, 5000. In the Hebrew, Syr., Ch., Sam., and Ar., it denotes *one* or unity. In the Julian calendar, A is the first of the seven dominical letters.

Among logicians, A, as an abbreviation, stands for a universal affirmative proposition. A asserts, E denies. Thus in *barbara*, *a*, thrice repeated, denotes so many of the propositions to be universal.

The Romans used A to signify a negative or dissent in giving their votes, A standing for *antiquo*, I oppose or object to the proposed law. Opposed to this letter were U. R., *ut rogas*, be it as you desire — the words used to express assent to a proposition. These letters were marked on wooden ballots, and each voter had an affirmative and a negative put into his hands, one of which, at pleasure, he gave as his vote. — In criminal trials, A. stood for *absolvo*, I acquit, C for *condamno*, I condemn, and N. L. for *non liquet*, it is not evident, and the judges voted by ballots thus marked. — In inscriptions, A. stands for *Augustus*, or for *ager*, *avunt*, *aurum*, *argentum*, &c.

A. is also used for *anno*; as in A. D., for *anno Domini*, the year of our Lord, and A. M., for *anno mundi*, the year of the world, and also for *ante*, as in A. M., for *ante meridiem*, before noon; and for *arts*, as in A. M., for *artium magister*, master of arts. With the Romans, A. U. C. stood for *anno urbis conditæ*, in the year from the building of the city of Rome.

In *algebra*, *a* and the first letters of the alphabet represent known quantities — the last letters are sometimes used to represent unknown quantities.

In *music*, A is the nominal of the sixth note in the natural diatonic scale — called by Guido *la*. It is also the name of one of the two natural moods; and it is the open note of the 2d string of the violin, by which the other strings are tuned and regulated.

In *pharmacy*, *ā* or *āā*, abbreviations of the Greek *ana*, signify *of each separately*, or that the things mentioned should be taken in quantities of the same weight or measure.

In *chemistry*, A A A stand for *amalgama*, or *amalgamation*.

In *commerce*, A. stands for *accepted*, as in case of a bill of exchange. Merchants also number their books by the letters, A, B, C, instead of figures. Public officers number their exhibits in the same manner; as the document A, or B.

Alpha and Omega, the first and last letters of the Greek alphabet, are used in Scripture for the *beginning* and *end* — representative of Christ.

In *mathematics*, letters are used as representatives of numbers, lines, angles, and quantities. In *arguments*, letters are substituted for persons, in cases supposed, or suited for illustration, as, A contracts with B to deliver property to D. — In the English phraseology, "a landlord has a hundred *a* year," "the sum amounted to ten dollars *a* man," *a* is merely the adjective *one*, and this mode of expression is idiomatic; a hundred in *a* [*one*] year; ten dollars to *a* [*one*] man.

AAM, *n.* [Ch. ם‌א, or ם‌א, a cubit, a measure containing five or six palms.] A measure of liquids among the Dutch, varying in different cities from 37 to 41 English wine gallons.

AA-RON'IC-AL, } ish high priest, or to the priesthood of which he was the head. *Doddridge.*

AB, in English names, is an abbreviation of *Abbey* or *Abbot*: as, *Alban*, *Abbey-town*, or *Abbot-town*.

At present, in Roman Catholic countries, abbots are *regular*, or such as take the vow, and wear the habit of the order; and *commendatory*, such as are seculars, but obliged, when of suitable age, to take orders. 1. The modulation of the voice in reading or speaking, as practiced by the ancient Greeks, which rendered their rehearsal musical. More strictly, in English,

2. A particular stress or force of voice upon certain syllables of words, which distinguishes them from the others. Accent is of two kinds, primary and secondary; as in *as'pi-ra'tion*. In uttering this word, we observe the *first* and *third* syllables are distinguished, the *third* by a full sound, which constitutes the *primary* accent, the *first*, by a degree of force in the voice which is less than that of the primary accent, but evidently greater than that which falls on the second and fourth syllables.

When the full accent falls on a vowel, that vowel has its long sound, as in *vo'cal*: but when it falls on an articulation or consonant, the preceding vowel is short, as in *hab'it*. Accent alone regulates English verse.

3 A mark or character used in writing to direct

the stress of the voice in pronunciation. Our ancestors borrowed from the Greek language three of these characters, the acute (´), the grave (`), and the circumflex (^, or ~). In the Greek, the first shows when the voice is to be raised; the second, when it is to be depressed, and the third, when the vowel is to be uttered with an undulating sound.

which the reeds are inserted, and upon which the reeds play. Each key playing on two apertures, the reeds of which are furnished with reversed valves, is made to command two successive notes in the scale, according as the wind is drawn in by expanding the chest, or forced out by closing it. In addition to the keys, there is a slide which opens upon reeds attuned to the harmonics of the tonic and dominant, by opening which the air has an harmonic accompaniment. The bottom of the chest is furnished with a large key, by which the chest may be opened, and suddenly exhausted or filled, as need requires. This is a melodious portable instrument, commanding two or three octaves in the diatonic scale. *Prof. Fitch.*

To *add to*, is used in Scripture, as equivalent to *give*, or *bestow upon*. Gen. xxx. Matt. vi. In Gal. ii. the word is understood to signify instruction; "In conference they *added* nothing to me." In narration, he or they *added*, is elliptical; he *added* words, or what follows, or he continued his discourse.

In general, when used of things, *add* implies a principal thing, *to* which a smaller is to be annexed, as a part of the whole sum, mass, or number.

In modern times, adoration is paid to the pope by kissing his feet, and to princes by kneeling and kissing the hand. This word was used by the Romans for acclamations or great applause given to public performers; and the election of a pope is sometimes by adoration, that is, by sudden acclamation without scrutiny. *Encyc.*

An illiterate person.

A-GRA'RI-AN, *a.* [L. *agrarius*, from *ager*, a field.]

1. Relating to lands. *Appropriately*, denoting or pertaining to an equal division of lands; as, the *agrarian* laws of Rome, which distributed the conquered and other public lands equally among all the citizens, limiting the quantity which each might enjoy. Authors sometimes use the word as a noun, an *agrarian*, for *agrarian law*. *Burke.*

2. Pertaining to agrarianism.

A-GREE', *v. i.* [Fr. *agréer*, from *gré*, will, accord. This is contracted from Sp. *agradar*, Port. id., to please, to gratify, whence *agradable*, agreeable; from the root of L. *gratia*, W. *rhad*, *grace*, favor, that comes freely. The primary sense is *advancing*, from the same root as L. *gradior*; W. *rhas*, [rhath;] Syr. ; *radak*, to go.]

1. To be of one mind; to harmonize in opinion; as, in the expediency of the law, all the parties *agree*.

2. To live in concord, or without contention; as, parents and children *agree* well together.

3. To yield assent; to approve or admit; followed by *to*; as, to *agree to* an offer, or *to* an opinion.

4. To settle by stipulation, the minds of parties being *agreed* as to the terms; as, to *agree* on articles of partnership.

Didst thou not agree with me for a penny a day? — Matt. xx.

5. To come to a compromise of differences; to be reconciled.

Agree with thine adversary quickly. — Matt. v.

6. To come to one opinion or mind; to concur; as, to *agree* on a place of meeting.

This sense differs not essentially from the fourth, and it often implies a resolving to do an act. John ix.

7. To be consistent; to harmonize; not to contradict, or be repugnant; as, this story *agrees* with what has been related by others.

Their witness agreed not together. — Mark xiv.

8. To resemble; to be similar; as, the picture does not *agree* with the original.

2. In pursuance of; in conformity with; as, *agreeable* to the order of the day, the House took up the report of the committee. It is not correctly followed by *with*. In this sense, some writers use *agreeably for agreeable*, but in violation of the true principles of construction; for the word is an adjective or attribute, in agreement with the last clause of the sentence. The House took up the report of the committee, (which taking up was) *agreeable* to the order of the day. The use of *agreeably* in this sentence would pervert the sense.

3. Pleasing, either to the mind or senses; as, *agreeable* manners; fruit *agreeable* to the taste.

2. Suitably; consistently, conformably.

The effect of which is, that marriages grow less frequent, *agreeably* to the maxim above laid down. *Paley.*

This is a gross error, proceeding from mistake. *Agreeably* signifies, *in an agreeable manner*; but this is not the sense, nor does the word modify the verb *grow*. The sense is, Marriages grow less frequent, which (fact, or whole member of the sentence, or proposition) is agreeable to the maxim above laid down. This use of *agreeably* is common, but very erroneous.

3. Alike; in the same manner.

An allegory is called a continued metaphor The following line in Virgil is an example of an allegory.

In Sw. *odal*, and in Dan. *odel*, signify *allodial*; the word being used as an adjective; Sw. *odalgods*, that is, *odal goods*, signifies allodial lands; and *odalyord*, odal earth, is used as its synonym. *Odalman* is one who possesses allodial land; *odalbonde* is a yeoman or freeholder; *odelt* signifies undivided; *o*, in Swedish, being a prefix, answering to the English *un*, and giving to words a negative signification. It is found in alluvial soils, or on the sea shore, in many places; particularly on the shores of the Baltic, in Europe, and at Cape Sable, in Maryland, in the United States. The ancient opinion of its vegetable origin seems not to be established, and it is believed or known to be a mineral bitumen. It yields, by distillation, an empyreumatic oil, and the succinic acid, which sublimes in small, white [illegible]. Its color usually presents some tint of [illegible]. It is highly electrical, and [illegible]. *Encyc. Chambers*

It does not effervesce with acids; it melts easily into a kind of yellow resin, and is soluble, but not readily, in spirit of wine. Various opinions have been entertained respecting its origin; but it is well ascertained that it is a morbid secretion into the intestines of the spermaceti whale, a species of Physeter. It has been found in that species of whale, but usually is found floating on the surface of the ocean, in regions frequented by whales; sometimes in masses of from 60 to 225 lbs. weight. In this substance are found the beaks of the cuttle-fish, on which that whale is known to feed. It is highly valued as a material in perfumery. *Encyc.*

It is sometimes followed by *of*; as, a man has an *ambition of* wit. Milton has used the word in the Latin sense of *going about* to solicit or obtain; but this sense is hardly legitimate.

In English, after the Oriental manner, it is used at the beginning, but more generally at the end of declarations and prayers, in the sense of, *be it firm, be it established.*

The word is used also as a noun. "All the promises of God are *amen* in Christ," that is, firmness, stability, constancy.

A-MEND', *v. i.* To grow or become better, by reformation, or rectifying something wrong in manners or morals. It differs from *improve*, in this, that to *amend* implies something previously wrong, to *improve*, does not.

A-MER'CED, *pp.* Fined at the discretion of a court.

A-MERCE'MENT, (a-mers'ment,) *n.* A pecuniary penalty inflicted on an offender at the discretion of the court. It differs from a *fine*, in that the latter is, or was originally, a fixed and certain sum prescribed by statute for an offense, but an amercement is arbitrary. Hence the practice of *affeering*. [See Affeer.] But, in *America*, the word *fine* is now used for a pecuniary penalty which is uncertain, and it is common, in statutes, to enact that an offender shall be *fined*, at the discretion of the court. In *England*, also, fines are now usually discretionary. Thus the word *fine* has, in a measure, superseded the use of *amercement.* This word, in old books, is written *amercia ment.*

AM PHIB'I-AL, *n.* }
AM PHIB'I AN, *n.* } [Gr. αμφι, both or about, and
AM-PHIB'I-A, *n. pl.* } βιος, life.]

In *zoology*, the Amphibia are a class of animals, so formed as to live on land, and for a long time under water. Their heart has but one ventricle, their blood is red and cold; and they have such command of the lungs, as for a considerable time to suspend respiration. This class of animals is divided into two orders, the Reptiles and the Serpents. To the first belong the Testudo or tortoise, the Draco or dragon, the Lacerta or lizard, and the Rana or frog; to the second, the Crotalus, Boa, Coluber, Anguis, Amphisbæna, and Cæcilia. *Linn.*

The term has also been applied by Cuvier to designate a family of marine quadrupeds, including the seal and walrus. *Fleming*

This term is strictly applicable only to such animals as possess both lungs and gills, as the siren, or other equivalent organs, as some of the lower animals. Less strictly, it may be applied to such animals as breathe by gills at one period of their existence, and by lungs at another, as the frog. *P. Cyc.*

AM-PHI-BOL'O GY, *n* [Gr. αμφι, βαλλω, and λογος, speech; αμφιβολια.]
A phrase or discourse, susceptible of two interpretations, and hence, a phrase or discourse of uncertain meaning. Amphibology arises from the order of the phrase, rather than from the ambiguous meaning of a word, which is called *equivocation*. We have an example in the answer of the oracle to Pyrrhus "Aio te Romanos vincere posse." Here *te* and *Romanos* may either of them precede or follow *vincere posse*, and the sense may be either, *you* may conquer the *Romans*, or the *Romans* may conquer *you*. Ten or twelve states were represented in this assembly, which sat alternately at Thermopylæ and at Delphi. Each city sent two deputies, one called *Hieromnemon* and the other *Pylagoras*. The former inspected the sacrifices and ceremonies of religion; the latter had the charge of deciding causes and differences between private persons. A genus of serpents, with the head small, smooth, and blunt, the nostrils small, the eyes minute and blackish, and the mouth furnished with small teeth The body is cylindrical, and divided into numerous annular segments: the tail obtuse, and scarcely to be distinguished from the head, whence the belief that it moved equally well with either end foremost There are two species, the *fuliginosa*, black with white spots, found in Africa and America; and the *alba*, or white species, found in both the Indies, and generally in ant-hillocks. They feed on ants and earth-worms, and were formerly deemed poisonous, but this opinion is exploded. *Encyc. Cyc.*
The aquatic amphisbæna, *Gordius aquaticus*, Linn, is an animal resembling a horse-hair, found in water, and moving with either end foremost. The vulgar opinion that this is an animated horse-hair is found to be an error. AN, *a* [Sax. *an, ane*, one; D. *een*; Ger. *ein*; Sw. and Dan. *en*; Fr. *on, un, une*; Sp. *un, uno*; It. *uno, una*; L. *unus, una, unum*; Gr. εν; Ir. *ean, ean, aon*; W. *un, yn*; Corn. *unyn*; Arm. *unan.*]

One; noting an individual, either definitely, known, certain, specified, or understood; or indefinitely, not certain, known, or specified. Definitely, as, "Noah built *an* ark of Gopher wood:" "Paul was *an* eminent apostle." Indefinitely; as, "Bring me *an* orange." Before a consonant the letter *n* is dropped; as, *a* man; but our ancestors wrote *an* man, *an* king. This letter represents *an* definitely, or indefinitely. Definitely; as, "I will take you to me for a people, and I will be to you a God." Ex. vi. Indefinitely; as, "The province of a judge is to decide controversies." *An*, being the same word as *one*, should not be used with it; "such *an one*," is tautology; the true phrase is *such one.* Although *an*, *a*, and *one*, are the same word, and always have the same sense, yet by custom, *an* and *a* are used exclusively as a definitive adjective, and *one* is used in numbering. Where our ancestors wrote *an, twa, thry*, we now use *one, two, three.* So *an* and *a* are never used except with a noun; but *one*, like other adjectives, is sometimes used without its noun, and as a substitute for it: "*One* is at a loss to assign a reason for such conduct."

An is to be used before a vowel and before a silent *h*; as, *an hour.* It is also used before *h* when the accent of the word falls on any syllable except the first; as in *historian*, and *historiographer.*

AN, in old English authors, signifies *if*; as, "*An* it please your honor." So in Gr. αν or εαν, Ar. إِنْ, Sam. and L. *an*, if or whether, Ir. *an*, Ch. ܐܢ or ܗܢ if, whether. It is probably an imperative, like *if*, *grf*, *give.* Qu. Sax. *annan*, or *unan*, to give.

A'NA, *aa*, or *a.* [Gr. ανα.]

In *medical prescriptions*, it denotes an equal quantity of the several ingredients; as, wine and honey, *ana, ℥ii.* or *a* oz. ii., that is, of wine and honey each two ounces.

A'NA, *as a termination*, denotes a collection of memorable sayings. Thus, *Scaligerana* is a book containing the sayings of Scaliger. Similar collections existed among the ancients, as the *Dicta Collectanea*, or sayings, of Julius Cæsar.

word is one which carries with it some relation to the original idea. *Thus* the word *firm* primarily denotes solidity or compactness in a material body; and by analogy, when used of the mind, it conveys the idea of qualities having a similitude to the solidity of bodies, that is, fixedness or immovability. *Watts.*

Learning *enlightens* the mind, because it is to the mind what *light* is to the eye, enabling it to discover things before hidden. When both the things which have an analogy follow a preposition, that preposition must be *between* or *betwixt*; as, there is an analogy *between* plants and animals, or *between* customs. When one of the things precedes a verb, and the other follows, the preposition used must be *to* or *with*, as, a plant has some analogy *to* or *with* an animal.

2. With *grammarians*, analogy is a conformity of words to the genius, structure, or general rules of a language. 1. Old; that happened or existed in former times, usually, at a great distance of time, as, *ancient* authors, *ancient* days. *Old*, says Johnson, relates to the duration of the thing itself; as, an *old* coat; and *ancient*, to time in general, as, an *ancient* dress. But this distinction is not always observed. We say, in *old* times, as well as *ancient* times, *old* customs, &c. We usually apply both *ancient* and *old* to things subject to gradual decay. We say, an *old* man, an *ancient* record, but never, the *old* sun, *old* stars, an *old* river or mountain. In general, however, *ancient* is opposed to *modern*, and *old* to *new*, *fresh*, or *recent*. When we speak of a thing that existed formerly, which has ceased to exist, we commonly use *ancient* as, *ancient* republics, *ancient* heroes, and not, *old* republics, *old* heroes. But when the thing which began or existed in former times, is still in existence, we use either *ancient* or *old*; as, *ancient* statues or paintings, or *old* statues or paintings, *ancient* authors, or *old* authors, meaning books. But, in these examples, *ancient* seems the most correct, or best authorized. Some persons apply *ancient* to men advanced in years, still living, but this use is not common in modern practice.

Hooker uses the word for *seniors*; "they were his *ancients*," but the use is not authorized.

2. *Ancient* is also used for a flag or streamer, in a ship of war, or the colors of a regiment; and for an ensign or the bearer of a flag, as in Shakspeare. Cowel supposes the word, when used for a flag, to be a corruption of *end-sheet*, a flag at the stern. It is probably the Fr. *enseigne*. *Johnson. Cowel. Encyc*

The real truth is not ascertained.]

Primarily, a metallic ore consisting of sulphur combined with a metal; the sulphuret of antimony, the *stibium* of the Romans, and the *στιμμι* of the Greeks. It is a blackish mineral, which stains the hands, hard, brittle, full of long, shining, needle like strie. It is found in the mines of Bohemia and Hungary, in France and England, and in America. This word is also used for the pure metal or *regulus of antimony*, a metal of a grayish or silvery white, very brittle, and of a plated or scaly texture, and of moderate specific gravity. By exposure to air, its surface becomes tarnished, but does not rust. It is used as an ingredient in concave mirrors, giving them a finer texture. In bells, it renders the sound more clear; it renders tin more hard, white, and sonorous, and gives to printing types more firmness and smoothness. It is also useful in promoting the fusion of metals, and especially in casting cannon balls. In its crude state, it is harmless to the human constitution, but many of its preparations act violently as emetics and cathartics. *Chambers. Encyc. Nicholson.*

AN-TIP'A-THY, *n.* [Gr. *αντι*, against, and *παθος*, feeling.]

Natural aversion; instinctive contrariety or opposition in feeling; an aversion felt at the presence, real or ideal, of a particular object. This word literally denotes a *natural* aversion, which may be of different degrees, and in some cases may excite terror or horror at the presence of an object. Such is the aversion of animals for their natural enemies, as the *antipathy* of a mouse to a cat or a weasel. Sometimes persons have an insuperable constitutional *antipathy* to certain kinds of food.

The word is applied, also, to aversion contracted by experience or habit, as when a person has suffered an injury from some food, or from an animal, which before was not an object of hatred, or when a particular kind of food or medicine is taken into a sickly stomach, and which nauseates it, the effect is *antipathy*, which is often of long continuance.

Antipathy, however, is often affected; as when persons pretend a great aversion to things from false delicacy.

2. In *ethics*, *antipathy* is hatred, aversion, or repugnancy, *hatred* to persons, *aversion* to persons or things; *repugnancy* to actions. These animals have only molar teeth, and are covered with a hard, bony shell, divided into movable belts, except on the forehead, shoulders, and haunches, where it is not movable. The belts are connected by a membrane, which enables the animal to roll itself up like a hedgehog. These animals burrow in the earth, where they lie during the daytime, seldom going abroad except at night. They are of different sizes; the largest more than three feet in length, without the tail. They subsist chiefly on fruits, roots, and insects; sometimes on flesh. Each of these pieces was called the *armature* of its respective pole, and the two together the *armature* of the magnet. In order to preserve the power of a magnet so armed, and to combine the action of the two poles, the latter were connected by a piece of iron, which also served as an armature. An artery is composed of three coats; the outer consists of condensed cellular membrane, and is supplied with numerous blood-vessels and nerves; the middle coat consists of circular fibers, formerly supposed by some to be muscular, but now regarded as a peculiar fibrous tissue, the inner coat, thin, smooth, and dense, confines the blood within its canal, and facilitates its motion.

Ask is not equivalent to *demand*, *claim*, and *require*, at least in modern usage; much less is it equivalent to *beg* and *beseech*. The first three words, *demand*, *claim*, *require*, imply a right, or supposed right, in the person asking, to the thing requested; and *beg* and *beseech* imply more urgency than *ask*. *Ask* and *request* imply no right, but suppose the thing desired to be a favor. The French *demander* is correctly rendered by *ask*, rather than by *demand.*

AS-PHALT', } *n.* [G *ασφαλτος.*]
AS-PHALT'UM, }

Bitumen Judaicum, Jew's pitch, a smooth, hard, brittle, black or brown substance, which breaks with a polish, melts easily when heated, and when pure, burns without leaving any ashes. It has little taste, and scarcely any smell, unless heated, when it emits a strong smell of pitch. It is found in a soft or liquid state on the surface of the Dead Sea, which, from this substance, is called *Asphaltites*, or the Asphaltic Lake. It is found also in the earth, in many parts of Asia, Europe, and America. Formerly, it was used for embalming dead bodies; the solid asphaltum is still employed in Arabia, Egypt, and Persia, instead of pitch, for ships; and the fluid asphaltum is used for varnishing, and for burning in lamps. It is also used for pavement in streets. A species found in Neufchatel is found excellent as a cement for walls and pavements; very durable in air, and not penetrable by water. AT, *prep.* [Sax. *æt*; Goth. *at*; L. *ad.* *At*, *ad*, and *to*, if not radically the same word, often coincide in signification. In W. *at* is *to*, and in Danish and Swedish, it is the sign of the infinitive mode; in Amh. *at*, *at wi*, is toward. The word *at* is doubtless the Oriental אתה, אתי, Ch. and Heb. to come, to approach. Hence it primarily denotes *presence*, *nearness*, *nearness*, *direction toward.*]

In general, *at* denotes *nearness* or *presence*: as, *at* the ninth hour, *at* the house; but it is less definite than *in* or *on*; *at* the house, may be *in* or *near* the house. It denotes also *toward*, *across*; as, to aim an arrow *at* a mark.

From this original import are derived all the various uses of *at*. *At* the sight, is *with*, *present*, or *coming* the sight; *at* this news, *present* the news, *on* or *with* the approach or arrival of this news. *At* peace, *at* war, in a state of peace or war, peace or war existing, being present; *at* ease, *at* play, *at* a loss, &c., convey the like idea. *At* arms, furnished with arms, bearing arms; *at* hand, within reach of the hand, and therefore *near*; *at* my cost, *with* my cost; *at* his suit, *by* or *with* his suit, *at* this declaration, he rose from his seat, that is, present, or coming this declaration, whence results the idea, *in consequence of it.* *At* his command, is either *under* his command, that is, literally, coming or being come his command, in the power of, or in consequence of it. He is good *at* engraving, *at* husbandry; that is, in performing that business. He deserves well *at* our hands, that is, from us. The peculiar phrases in which this word occurs, with appropriate significations, are numerous. *At* first, *at* last, *at* least, *at* best, *at* the worst, *at* the highest or lowest, are phrases in which some noun is implied; as, at the first time or beginning, at the last time, or point of time; at the least or best degree, &c.; all denoting an extreme point or superlative degree. *At all*, is in any manner or degree.

At is sometimes used for *to*, or *toward*, noting progression or direction; as, he aims *at* perfection; he makes or runs *at* him, or points *at* him. In this phrase, he longs to be *at* him, *at* has its general sense of *upon him*, or *present*, or *with*, in contest or attack

AT-TACH'MENT, *n.*

1. A taking of the person, goods, or estate, by a writ or precept in a civil action, to secure a debt or demand.

2. A writ directing the person or estate of a person to be taken, to secure his appearance before a court. In *England*, the first notice to appear in court is by *summons*; and if the defendant disobeys this monition, a writ of attachment issues, commanding the sheriff to *attach* him, by taking gage, or security in goods, which he forfeits by non-appearance, or by making him find safe pledges or sureties for his appearance. But in trespasses, an attachment is the first process. In *this country*, *attachment* is more generally the first process; and in some states, the writ of attachment issues at first against the property or person of the defendant. In *Connecticut*, this writ issues against the person, goods, or land, in the first instance, commanding to take the goods and estate of the defendant, if to be found, or otherwise, to take his body. In *England*, witnesses not appearing upon a summons, may be taken by *attach*

ment: a process called with us a *capias*. Attachments also issue against persons for contempt of court. The *court of attachments*, in England, is held before the verderors of the forest, to *attach* and try offenders against vert and venison.

Foreign attachment, is the taking of the money or goods of a debtor in the hands of a third person; as when the debtor is not within the jurisdiction of the court, or has absconded. Any person who has goods or effects of a debtor, is considered in law as the agent, attorney, factor, or trustee of the debtor, and an attachment served on such person binds the property in his hands to respond the judgment against the debtor.

3. Close adherence or affection, fidelity; regard; any passion or affection that binds a person; as, an *attachment* to a friend, or to a party.

It seems to be allied to *attach*; but the latter verb agrees better with the Eth. ጠወቀ *tok*, *took*, to press, whence ኣጥወቀ *atook*, to press, to make close, and the Ch. תק, to accuse, to vomit. Class Dg.]

1. To assault, to fall upon with force, to assail, as with force and arms. It is the appropriate word for the commencing act of hostility between armies and navies.

2. To fall upon, with unfriendly words or writing; to begin a controversy with, to attempt to overthrow or bring into dispute, by satire, calumny, or criticism, as, to *attack* a man or his opinions in a pamphlet.

AT-TAIN', *v. i.* [Fr. and Norm. *atteindre*, L. *attingo*, to reach, come to, or overtake, *ad* and *tango*, to touch, reach, or strike, that is, to thrust, urge, or push to. It has no connection with L. *attineo*. See Class Dg.]

1. To reach, to come to or arrive at, by motion, bodily exertion, or efforts toward a place or object.

If by any means they might *attain* to Phenice.—Acts xxvii.

2. To reach, to come to or arrive at, by an effort of mind.

Such knowledge is too wonderful for me; it is high; I can not *attain* to it.—Ps. cxxxix.

Regularly this verb should be always followed by *to*; the omission of *to*, and the use of the verb in a transitive sense, may have originated in mistake, from the opinion that the verb is from the L. *attineo*, and equivalent to *obtain*.

AT-TAIN', *v. t.*

1. To gain, to compass; to achieve or accomplish, that is, to reach by efforts, without *to* following.

Is he wise who hopes to *attain* the end without the means? *Tillotson.*

This use of the verb is now established; but in strictness *to* is here implied, *attain to* the end. The real sense, as in the intransitive use of the verb, is, *to reach or come to* the end or purpose in view. This word always implies *an effort toward* an object. Hence it is not synonymous with *obtain* and *procure*, which do not necessarily imply such effort. We *procure* or *obtain* a thing by *purchase* or *loan*, and we *obtain* by inheritance, but we do not *attain* it by such means. An inattention to this distinction has led good authors into great mistakes in the use of this word.

2. To reach or come to a place or object by progression or motion.

But ere such things shall his *oure attain*. *Hoole's Tasso.*
Cannace he now *attaine* *Milton.*

AT-TAIN'A-BLE, *a.* That may be attained; that may be reached by efforts of the mind or body; that may be compassed or accomplished by efforts directed to the object; as, perfection is not *attainable* in this life. From an inattention to the true sense of this word, as explained under ATTAIN, authors have very improperly used this word for *obtainable, procurable*; as in the following passages: "The kind and quality of food and liquor, the species of habitation, furniture and clothing, to which the common people of each country are habituated, must be *attainable* with ease and certainty." *Paley, Philos.* b. 6, chap. 11. "Gen. Howe would not permit the purchase of those articles [clothes and blankets] in Philadelphia, and they were not *attainable* in the country." *Marshall's Life of Washington*, 3, 427. Each of those words should be *obtainable*.

A statute of parliament attainting a criminal, is called an *act* or *bill of attainder*. By a statute of 3-4 Wm. IV., the consequences of attainder are limited to the life of the person attainted.

Upon the thorough demonstration of which guilt by legal *attainder*, the feudal covenant is broken. *Blackstone.*

A public attorney, or attorney at law, is an officer of a court of law, legally qualified to prosecute and defend actions in such court, on the retainer of clients. The attorney at law answers to the *procurator*, or proctor, of the civilians and canonists, and to the solicitor, in chancery.

In *Great Britain*, and some of the *United States*, attorneys are not admitted to practice in any court until examined, approved, licensed, and sworn by that court, after which they are proper officers of the court, but in *Connecticut*, an attorney admitted and sworn by one of the county courts, is authorized to practice in all the courts of the State.

In *Great Britain*, attorneys are not admitted to plead at the bar, or to be advocates or counsel, in the higher courts; this privilege being confined to barristers and serjeants.

In *New York*, and in *Massachusetts*, there is a distinction observed between attorneys and counselors at law, but in most of the *United States*, the two offices are combined, or that of attorney alone retained.

In *Virginia*, the duties of attorney, counselor, conveyancer, and advocate, are all performed by the same individual. *Wirt*

An attorney may have *general* powers to transact business for another, or his powers may be *special*, or limited to a particular act or acts.

Attorney general, in *Great Britain*, is an officer appointed by the crown, with general powers to act in all legal proceedings, in which the crown is a party, particularly, to prosecute in criminal matters affecting the state. In the government of the *United States*, and in some of the State governments, the attorney general is an officer with corresponding powers.

authority from one person empowering another to transact business for him.

Attraction is distinguished into that which is manifested between bodies or masses at sensible distances, and that which is manifested between the particles or molecules of bodies at insensible distances. The former includes the *attraction of gravity*, or *gravitation*, or the mutual tendency of all bodies to each other, as the tendency of the planets toward the sun, or of a stone, when raised in the air, to fall to the earth; and also, the *attraction of magnetism*, and *that of electricity*. The latter takes place either between particles of the same kind, or homogeneous particles, and is then called the *attraction of aggregation*, or *cohesion*; or between dissimilar or heterogeneous particles, uniting them into compounds, and is then called *chemical attraction*, or *affinity*. The attractions of the first class, however, exist between particles as well as masses, and the surfaces of masses in contact, or at inappreciable distances, also attract each other, causing *adhesion*, in heterogeneous as well as homogeneous bodies.

The *attraction of gravity* is supposed to be the great principle which confines the planets in their orbits. Its power or force is *directly* as the quantity of matter in a body, and *inversely* as the squares of the distances of the attracting bodies.

2. To take satisfaction for, by pain or punishment inflicted on the injuring party.

He will *avenge* the blood of his servants. — Deut. xxxii

Here, the thing for which satisfaction is taken is the object of the verb.

3 To revenge. To *avenge* and *revenge*, radically, are synonymous. But modern usage inclines to make a valuable distinction in the use of these words, restricting *avenge* to the taking of just punishment, and *revenge* to the infliction of pain or evil maliciously, in an illegal manner

4. To punish, as, to *avenge* a crime. *Dryden.*

1. To affirm with confidence; to declare in a positive or peremptory manner, as in confidence of asserting the truth. *Prior.*

2. In *law*, to offer to verify. [See AVERMENT.]

AV'ER-AGE, *n.* [Norm. *aver*, *avers*, cattle, money, goods, Sp. *averio*, from *aver* or *haber*, Fr. *avoir*, to *have* or possess. In *ancient law*, a duty or service which a tenant was bound to render to his lord, by his beasts and carriages or instruments of husbandry. *Spelman.* But *averagium* signifies also the loss of goods in transportation; Sp. *averia*, damage sustained by goods or ships; Port. *avaria*, an allowance out of freight to the master of a ship, for damage sustained; contribution by insurers, to make good a loss; It. *avaria*; Dan. *havarie*, damage of a ship or waste of goods, extraordinary charges during a voyage. If *avaria* signifies damage, and is from *aver* or *haber*, Spanish, to have, the sense of the word is probably that which happens or falls, a misfortune, for the verb *have* and *happen* are radically the same word; Spanish, *haber*, to have, and to happen or befall; also, fortune, property. This would give the sense of damage, or of proportion, lot, share, that which falls to each of a number. But the primary sense is not very obvious.]

1. In *commerce*, a contribution to a general loss. When, for the safety of a ship in distress, any destruction of property is incurred, either by cutting away the masts, throwing goods overboard, or other means, all persons who have goods on board, or property in the ship, contribute to the loss according to their average, that is, the goods of each on board. This principle, introduced into the commerce of Europe from the Rhodian laws, and recognized by the regulations of Wisby, is now an established rule in the maritime laws of Europe; for it is most reasonable that, when one man's property is sacrificed to save a ship, all persons whose property is saved, or in like hazard, should bear their proportion of the loss. *Park. Beawes. Spelman.*

2. From the practice of contributing to bear losses in proportion to each man's property, this word has obtained the present popular sense, which is, that of a mean proportion, medial sum or quantity, made out of unequal sums or quantities. Thus, if A loses 5 dollars, B 9, and C 16, the sum is 30, and the average 10.

3. A small duty, payable, by the shippers of goods, to the master of the ship, over and above the freight, for his care of the goods. Hence the expression in bills of lading, "paying so much freight, with primage and *average* accustomed." *Cowel. Encyc.*

4. In *England*, the breaking up of cornfields, eddish, or roughings. *Ask.*

A turning from with disgust or dislike; aversion; hatred; distastination. *South.*

It is nearly superseded by AVERSION.

A-VERSE', (avers',) *a.* [See AVERT.] The literal sense of this word is, *turned from*, in manifestation of dislike. Hence the real sense is,

1. Disliking; unwilling; having a repugnance of mind.

Averse alike to flatter or offend. *Pope.*

2. Unfavorable; indisposed; malign.

And Pallas, now *averse*, refused her aid. *Dryden.*

This word and its derivatives ought to be followed by *to*, and never by *from*. This word includes the idea of *from*; but the literal meaning being lost, the affection of the mind signified by the word, is *exerted toward* the object of dislike, and, like its kindred terms, *hatred*, *dislike*, *contrary*, *repugnant*, &c., should be followed by *to*. Indeed, it is absurd to speak of an affection of the mind exerted *from* an object.

Averse expresses a less degree of opposition in the mind than *detesting* and *abhorring*.

Milton twice uses *averse* in its literal sense of *turned away*, with *from*; but it is not according to the English idiom.

3. Turned backward; in a direction contrary to progression; as, tracks *averse*. *Dryden.*

A-VERSE'LY, (a-vers'ly,) *adv.* With repugnance; unwillingly.

2. Backward; behind; as, an arm stretched *aversely*. *Davenant. Brown.*

1. Opposition or repugnance of mind; dislike; disinclination; reluctance; hatred. Usually this word expresses moderate hatred, or opposition of mind, not amounting to *abhorrence* or *detestation*. It ought generally to be followed by *to* before the object. [See AVERSE.] Sometimes it admits of *for*.

A freeholder is tried with an *aversion* to subjection. *Addison.*

2. Opposition or contrariety of nature: *applied to inanimate substances.*

Magnesia, notwithstanding this *aversion* to solution, forms a kind of paste with water. *Fourcroy, Trans.*

B.

B is the second letter, and the first articulation, or consonant, in the English, as in the Hebrew, Greek, Latin, and most other alphabets. In the Ethiopic, it is the ninth letter, and its shape is that of a hut. Perhaps from this or other like figure, it received its Hebrew name, *beth*, a house. It is a *mute* and a *labial*, being formed by pressing the whole length of the lips together, as in pronouncing *eb*. It is less perfectly mute than *p*, as may be perceived by pronouncing the syllables *ab* and *ap*. It is convertible, 1st, with *p*, as in the Celtic *ben* or *pen*, a mountain; in the English *beak* and *peak*, *beck* and *peck*; 2d, with *v*, as in the German *silber*, for *silver*; and in Spanish, *b* and *v* are often used indifferently; 3d, with *f*, as in English *bore*, and Latin *foro*; English *bear*, Latin *fero*; in the Celtic *ban*, *bunadh*, *bunait*, stock, origin, foundation; English *bread*; Latin *fermentum*; with the Greek φ, as *Philip*, for Φιλιππος; 4th, with *v* and *w*; as, Irish *fier*, Latin *verus*; *fier*, *vir*, Irish *buas*, the wick of a candle.

The Modern Greek B is always pronounced like the English V, and the Russian B corresponds with it.

In composition, the letter B is changed into *p* before the letter *p*; as in *opprimo*, from *ob* and *premo*; *oppono*, from *ob* and *pono*; into *f*, before *f*, as in *effero*, from *ab* and *fero*; into *c* before *s*, as in *accido*, from *ob* and *cædo*, and *cædo*.

As a numeral, B was used by the Hebrews and Greeks, as now by the Arabians, for 2; by the Romans for 300, and with a dash over it, thus, B̄, for 3000. B is used also as an abbreviation; thus B. A. stand for *bachelor of arts*; B. L. for *bachelor of laws*; B. D. for *bachelor of divinity*; B. F. prefixed to the decrees of the old Romans, for *bonus factum*. In music, B stands for the tone above A; B♭, for B flat, or the semitone major above A. B. also stands for base, and B. C. for *basso continuo*, or thorough base.

BAL'SAM, *n.* [Gr. βαλσαμον; L. *balsamum.*]

1. An oily, aromatic, resinous substance, flowing spontaneously or by incision from certain plants. A great variety of substances pass under this denomination. But in modern chemistry, the term was once confined to such vegetable juices as are liquid or spontaneously become concrete, and consist of a resinous substance, combined with benzoic acid, or capable of affording it by decoction or sublimation. The balsams are either liquid or solid; of the former are the balm of Gilead and the balsams of copaiva, Peru, and Tolu; of the latter, benzoin, dragon's blood, and storax.

Encyc. Nicholson. Ure.

The opinion that balsams contain or necessarily furnish benzoic acid, is not now generally sustained. The substances known as balsams are properly compounds of resin and essential oil, some of which, however, furnish benzoic acid by partial decomposition or distillation.

1. In *Great Britain*, a title or degree of nobility; a lord, a peer; one who holds the rank of nobility next below that of a viscount, and above that of a knight or baronet. Originally, the barons, being the feudatories of princes, were the proprietors of land held by honorable service. Hence, in ancient records, the word *barons* comprehends all the nobility. All such, in England, had, in early times, a right to sit in parliament. As a *baron* was the proprietor of a manor, and each manor had its *court-baron*, hence the *barons* claimed, and to this day enjoy, the right of judging in the last resort; a right pertaining to the house of lords, or peers, as the representatives of the ancient *barons*, *land-holders*, *manor-holders*.

Anciently, *barons* were greater, or such as held their lands of the king *in capite*, or lesser, such as held their lands of the greater barons by military service *in capite*.

The title of *baron* is no longer attached to the possession of a manor, but given by the king's letters patent, or writ of summons to parliament, that is, the dignity is personal, not territorial.

BE, *v. i. substantive verb*, *ppr.* BEING; *pp.* BEEN. [Sax. ب و د

beon, to be. G. *bin*, *bist*; D. *ben*, Pers. بودن *bodan*, to be. San. *bhu*; and W. *bôd*, *byzu*, *bydiaw.* The sense is, to stand, remain, or be fixed; hence, to continue. This verb is defective, and its defects are supplied by verbs from other roots, *am*, *is*, *was*, *were*, which have no radical connection with *be.* The case is the same with the substantive verb in most languages.]

1. To be fixed, to exist; to have a real state or existence, for a longer or shorter time.

Let this mind be in you, which was in Christ Jesus. — Phil. ii

5. To have a particular manner of being or happening; as, How *is* this affair? How *was* it? What *were* the circumstances?

This verb is used as an auxiliary in forming the tenses of other verbs, and particularly in giving to them the passive form; as, he has *been* disturbed. It forms, with the infinitive, a particular future tense, which often expresses duty, necessity, or purpose; as, government *is to be* supported we *are to pay* our just debts.

Let be, is to omit, or leave untouched; to let alone

Let be, said he, my prey. *Dryden*

BE, a prefix, as in *because*, *before*, *beset*, *bedeck*, is the same word as *by*, Sax. *be*, *big*, Goth. *bi.* It is common to the English, Saxon, Gothic, German, Dutch, Danish, and Swedish languages. It occurs probably in the Russian, but is written *po*, as it is in *possible*, and a few other words in the Latin. It denotes nearness, closeness, about, on, at, from some root signifying to pass, or to press. [See By.]

That this word is the Shemitic ב, used as a prefix, is certain, not only from its general application, which may be seen by comparing the uses of the word, in the Hebrew, for instance, with those in the Saxon, but from its use in particular phrases, particularly in its use before the name of the Supreme Being, in swearing. Hence we find that ב is *not* from בית nor from ברית, as Parkhurst supposes, but is an abbreviation of *by*, which is used in the Saxon, *bi-spell*, a proverb, a *by* word; *bigstandan*, to stand *by*

The stock is, in fact, never delivered, and was never meant to be. When the time for delivery arrives, the losing party pays the *difference* between the price of the stock *then* and at the time when the contract was made.

1. An assemblage of graces, or an assemblage of properties in the form of the person or any other object which pleases the eye. In *the person*, due proportion or symmetry of parts constitutes the most essential property to which we annex the term *beauty*. In *the face*, the regularity and symmetry of the features, the color of the skin, the expression of the eye, are among the principal properties which constitute *beauty*. But as it is hardly possible to define all the properties which constitute beauty, we may observe in general, that *beauty* consists in whatever pleases the eye of the beholder, whether in the human body, in a tree, in a landscape, or in any other object.

Beauty is *intrinsic*, and perceived by the eye at first view, or *relative*, to perceive which, the aid of the understanding and reflection is requisite. Thus the *beauty* of a machine is not perceived till we understand its uses, and adaptation to its purpose. This is called *the beauty of utility*. By an easy transition, the word *beauty* is used to express what is pleasing to the other senses, or to the understanding. Thus we say, the *beauty* of a thought, of a remark, of sound, &c.

So *beauty*, armed with virtue, bows the soul

BEE, *n* [Sax *bee*, D. *bye*; G. *biene*, Sw. *bi*, Dan. *bie*, Ir *beach*; It *pecchia*; Sp. *abeja.* Class Bg.]

1. An insect of the genus Apis. [See APIS.] The species are numerous, of which the honey bee is the most interesting to man. It has been cultivated from the earliest periods, for its wax and honey. It lives in swarms, or societies, of from 10,000 to 50,000 individuals. These swarms contain three classes of bees, the females or queen bees, of which there is only one in each swarm, the males or drones, and the neuters or working bees. Of the former, there is only one in each hive or swarm, whose sole office is to propagate the species. It is much larger than the other bees. The drones serve merely for impregnating the queen, after which they are destroyed by the neuters. These last are the laborers of the hive. They collect the honey, form the cells, and feed the other bees and the young. They are furnished with a proboscis, or tongue, by which they collect the honey from flowers, and a mouth, by which they swallow it, and then convey it to the hive in their stomachs, where they disgorge it into the cells. The pollen of flowers settles on the hairs with which their body is covered, whence it is collected into pellets by a brush on their second pair of legs, and deposited in a hollow in the third pair. It is called *bee-bread*, and is the food of the *larvæ* or young. The adult bees feed on honey. The wax was supposed to be formed from pollen by a digestive process, but it is now ascertained that it is formed from the honey by a similar process. The females and neuters have a barbed sting, attached to a bag of poison, which flows into the wound inflicted by the sting. When a hive is overstocked, a new colony is sent out under the direction of a queen bee. This is called *swarming.* *Cuv. Ed. Encyc.*

BE-GUN', pp. of BEGIN. Commenced, originated.

BE-HALF', (be-hăf',) n. [This word is probably a corruption. It composed of *be* and *half*, it is a word of modern origin; but I take it to be the Sax. *behefe*, profit, need, or convenience, G. *behuf*, D. *behoef*, necessaries, business, *behoeve*, behalf, Sw. *behof*, Dan. *behov*, need, necessity, sufficiency, or what is required, sustenance, or support, from the verb *be hoove*, *behafva*, *behöfva*, to need. The spelling is therefore corrupt, it should be *behof* or *behoof*. See BEHOOF.]

1. Favor, advantage; convenience, profit; support; defense, vindication, as, the advocate pleads in *behalf* of the prisoner, the patriot suffers in *behalf* of his country.

2 Part, side, noting substitution, or the act of taking the part of another, as, the agent appeared in *behalf* of his constituents, and entered a claim.

BE-HAP'PEN, v. t. [*be* and *happen.*] To happen to. *Spenser.*

BE HAVE', v. t. [G. *gehaben*, Sax. *gehabban*, and *behabban*, *be* and *have.*]

1. To restrain; to govern, to subdue. [*The Saxon sense of the word.*]

He did *behave* his anger ere 'twas spent. *Shak*

This sense is obsolete. Yet it often seems to be implied; for to *behave one's self*, is really to *govern* one's self, to have in command.

2. To carry; to conduct, used with the reciprocal pronoun, as, he *behaves himself* manfully. But the tendency of modern usage is to omit the pronoun, as, he *behaves* well.

BE-HAVE', v. i. To act, to conduct, generally applied to manners, or to conduct in any particular business, and in a good or bad sense. He *behaves* well or ill.

BE-HAV'ED, pp. Conducted

BE-HAV'ING, ppr. Carrying, conducting.

BE-HAV'IOR, (be-hāv'yur,) n. [See BEHAVE.] Manner of behaving, whether good or bad, conduct, manners; carriage of one's self, with respect to propriety or morals; deportment. It expresses external appearance or action, sometimes in a particular character; more generally in the common duties of life, as, our future destiny depends on our *behavior* in this life. It may express correct or good manners, but I doubt whether it ever expresses the idea of *elegance of manners*, without another word to qualify it.

To be upon one's behavior, is to be in a state of trial, in which something important depends on propriety of conduct. The modern phrase is, *to be*, or *to be put, upon one's good behavior*. Judges hold their office during *good behavior*; that is, during the integrity and fidelity of their official conduct.

BE'HE-MOTH, n. [Heb. בהמה, plural of בהמה, a beast or brute, from an Arabic verb, which signifies, to shut, to lie hid, to be dumb. In Eth. dumb.]

Authors are divided in opinion as to the animal intended in Scripture by this name; some supposing it to be an ox, others, an elephant; and Bochart labors to prove it the hippopotamus, or river horse. It seems to unite some of the peculiar characteristics of all, and hence some consider it as a kind of type or representation of the largest land animals, under the general name of *behemoth*, which is a plural, denoting, literally, *beasts*. *Kitto.* The original word in Arabic signifies a brute or beast in general, especially a quadruped.

BE'HEN, } n. A plant. The white behen is a species
BEN, } of Cucubalus, called Swedish Lychnis,
BEK'EN, } or gum sepungar, also spelling poppy and bladder campion, (*Cucubalus behen*, Linn., *Silene inflata*, Decand.) The empalement of its flower resembles network, and its leaves have somewhat of the flavor of peas. *Family of Plants. Encyc.*

To promise, to intrust; to call or name; to command, to adjudge, to address, to inform, to mean, to reckon. The orthography is corrupt, it should be *behite*. [*Obs.*] *Spenser. Chaucer.*

BE HIND', prep. [Sax. *behindan*, of *be* and *hindan*, behind, Goth. *hindar*, beyond, behind, *hindar leithan*, to pass, præterire, Ger. *hinter.*]

1. At the back of another; as, to ride *behind* a horseman.

4. Left at a distance, in progress or improvement, as, one student is *behind* another in mathematics.

5. Inferior to another in dignity and excellence.

For I suppose I was not a whit *behind* the very chiefest apostles —2 Cor. xi

6. On the side opposite the front or nearest part, or opposite to that which fronts a person, on the other side, as, *behind* a bed, *behind* a hill, *behind* a house, tree, or rock.

Behind the back, in *Scripture*, signifies, out of notice or regard, overlooked, disregarded.

5. Remaining after a payment, unpaid; as, there is a large sum *behind*.

6. Remaining after the departure of, as, he departed and left us *behind*.

BE-HYND'HAND, a. [*behind* and *hand.*] In arrear; in an exhausted state; in a state in which rent or profit has been anticipated, and expenditures precede the receipt of funds to supply them. In *popular use*, a state of poverty, in which the means of living are not adequate to the end. Also, in a state of backwardness, in which a particular business has been delayed beyond the proper season for performing it, as, he is *behindhand* in his business.

Behindhand with, is *behind* in progress; not upon equal terms in forwardness; as, to be *behindhand with* the fashionable world.

This word is really an adjective, as it is applied to the *person* rather than to the *verb*; but like *adrift*, *aloft*, *ashamed*, and several other words, never precedes the noun. Shakspeare's "behindhand slackness," therefore, according to present usage, is not a legitimate phrase.

BE-HOLD', v. t.; pret. and pp. BEHELD. [Sax. *behealdan*, *behealdan*, *gehealdan*, *gehaldan*, from *healdan*, to hold. The sense is, to hold, to have in sight, from straining, restraining. In Saxon, the verb signifies not only to look or see, but to guard; so in Latin, *observo*, from *servo*, to keep. This explication leads us to an understanding of the participle *beholden*, which retains the primitive sense of the verb, *bound*, *obliged*. The Germans retain the original sense in *behalten*, to hold or keep; as the Dutch do in *gehouden*, held, bound; and the Danes in *beholde*, to keep, retain; *behold*, a retreat, refuge, reservation. See OBSERVE and REGARD.]

1. To fix the eyes upon; to see with attention; to observe with care.

2. To fix the attention upon an object; to attend, to direct or fix the mind.

Behold, I stand at the door and knock —Rev. iii

This word is much used in this manner, for exciting attention or admiration. It is in the imperative mode, expressing command or exhortation, and by no means a mere exclamation.

BE-HŌLD'EN, (be-hōld'n,) pp. or a. [The participle of BEHOLD, to keep, guard, or bind. See BEHOLD.] Obliged; bound in gratitude; indebted.

Little are we *beholden* to your love *Shak.*

1. To give the lie to, to show to be false, to charge with falsehood, as, the heart *belies* the tongue. It is rarely used of declarations, but of appearances and facts which show that declarations, or certain appearances and pretenses, are false and hypocritical. Hence,

From these words, it appears that *belief* is from the root of *leave*, permission, assent, Sax. *leaf*, leave and *belief*, L. *fides*, *lecfa*, permission, license, written, also, *lef* and *lefa*, *lefan*, to permit, D. *geloof*, G. *glaube*, belief, credit, faith, *gelauben*, *glauben*, to believe, Dan. *belove*, to promise; D. *oorlof*, *verlof*, leave, permission, G. *urlaub*, leave, *furlough.* The primary sense of *believe*, is to throw or put to, or to assent to, to leave with or to rest on, to rely. See LEAVE and LIVE.]

1. A persuasion of the truth, or an assent of mind to the truth of a declaration, proposition, or alleged fact, on the ground of evidence, distinct from personal knowledge, as, the *belief* of the gospel, *belief* of a witness. *Belief* may also be founded on internal impressions, or arguments and reasons furnished by our own minds, as, the *belief* of our senses, a train of reasoning may result in *belief.* *Belief* is opposed to *knowledge* and *science.*

2. In *theology*, faith, or a firm persuasion of the truths of religion.

No man can attain [to] *belief* by the bare contemplation of heaven and earth. *Hooker*

3. Religion, the body of tenets held by the professors of the faith.

In the heat of persecution, to which Christian *belief* was subject upon its first promulgation. *Hume*

☞ In some cases, the word is used for persuasion or opinion, when the evidence is not so clear as to leave no doubt, but the shade of strength in opinion can hardly be defined, or exemplified. Hence the use of qualifying words; as, a *firm*, *full*, or *strong belief.*

5. The thing believed; the object of belief.

Superstitious prophecies are the *belief* of fools. *Bacon.*

6. A creed; a form or summary of articles of faith. In this sense, we generally use *creed.*

BE-LIEVE', *v. t.* To credit upon the authority or testimony of another; to be persuaded of the truth of something upon the declaration of another, or upon evidence furnished by reasons, arguments, and deductions of the mind, or by other circumstances than personal knowledge. When we *believe* upon the authority of another, we always put confidence in his veracity. When we *believe* upon the authority of reasoning, arguments, or a concurrence of facts and circumstances, we rest our conclusions upon their strength or probability, their agreement with our own experience, &c.

2. To expect or hope with confidence; to trust.

I had fainted, unless I had *believed* to see the goodness of the Lord in the land of the living.—Ps. xxvii.

BE-LIEVE', *v. i.* To have a firm persuasion of any thing. In some cases, to have a full persuasion, approaching to certainty, in others, more doubt is implied. It is often followed by *in* or *on*, especially in the Scriptures. *To believe in*, is to hold as the object of faith. "Ye *believe in* God, *believe* also *in* me." John xiv. *To believe on*, is to trust, to place full confidence in, to rest upon with faith. "To them gave he power to become the sons of God, even to them that *believe on* his name." John i. *Johnson.* But there is no ground for much distinction.

In *theology*, to *believe* sometimes expresses a mere assent of the understanding to the truths of the gospel, as in the case of Simon. Acts viii. In others, the word implies, with this assent of the mind, a yielding of the will and affections, accompanied with a humble reliance on Christ for salvation. John i. 12. iii. 15.

In *popular use* and *familiar discourse*, to *believe* often expresses an opinion in a vague manner, without a very exact estimate of evidence, noting a mere preponderance of opinion, and is nearly equivalent to *think* or *suppose.*

BE-LIEVED, *pp.* Credited, assented to, as true.

BE-LIEVER, *n.* One who believes, one who gives credit to on evidence than that of personal knowledge.

2. In *theology*, one who gives credit to the truth of the Scriptures, as a revelation from God. In a more restricted sense, a professor of Christianity; one who receives the gospel, as unfolding the true way of salvation, and Christ as his Savior.

In *the primitive church*, those who had been instructed in the truths of the gospel and baptized, were called *Believers* in distinction from the *catechumens*, who were under instruction, as preparatory to baptism and admission to church privileges. *Encyc.*

The blue tunic of the Jewish high priest was adorned with golden bells, and the kings of Persia are said to have the hem of their robe adorned with them in like manner. Among the Greeks, those who went the nightly rounds in camps or garrisons, used to ring a bell, at each station or box, to see that the soldier on duty was awake. *Bells* were also put on the necks of animals, to warn persons to move out of the way of so ill an omen as the sight of a criminal or inconvenience, also, on the necks of beasts and birds, and in houses. In churches and other public buildings, *bells* are now used to notify the time of meeting of any congregation or other assembly. *Encyc.*

From *trahir* is formed *trahison*, and *trahison*, treason. If *traho* is the root, the sense is, to draw aside, to withdraw, or lead away; which would agree with the D. *bedriegen*, G. *betrügen*, Sw. *bedraga*, Dan. *bedrage*, to deceive; and *treachery*, Fr. *tricherie*, is from the root of *trick*. I do not find *betrogan* in the Saxon, but *bearg* is rendered *pfellit*, and this is from *dragan*, to draw. *Betray*, then, seems to be a compound of *be* and *dragan*, to draw; and *betrase* supra, may be from a different root. [*This is unusual, and hardly legitimate.*]

This word, though here admitted as a verb, from the Saxon, is rarely used as a verb in fact, or it is a verb, is now never used except in the imperative mode. It is a compound of *be* and the Old English *ware*, now *wary*. *Be wary* of danger. Hence, it can not be used with *did*, like a regular verb, nor with *to* in any of its inflections, — he is *beware*: for this would be to use the substantive verb twice before *ware* and *wary*, as and *be*. Ben Jonson, however, has used the word in the third person. He *bewares* not. But it has no past tense or participle, and therefore, if admitted as a verb, it is defective, and used only in the imperative mode, or after an auxiliary.

3. In the Greek, Latin, and some Protestant churches, a prelate, or person consecrated for the spiritual government and direction of a diocese. In *Great Britain*, bishops are nominated by the king, who, upon request of the dean and chapter for leave to elect a bishop, sends a *congé d'elire*, or license to elect, with a letter missive, nominating the person whom he would have chosen. The election, by the chapter, must be made within twelve days, or the king has a right to appoint whom he pleases. Bishops are consecrated by an archbishop, with two assistant bishops. A bishop must be thirty years of age, and all bishops, except the bishop of Man, are peers of the realm. *Blackstone.*

By the canons of the Protestant Episcopal church in the United States, no diocese or state shall proceed to the election of a bishop, unless there are at least six officiating presbyters residing therein, who shall be qualified, according to the canons, to vote for a bishop; a majority of whom, at least, must concur in the election. But the conventions of two or more dioceses, or states, having together nine or more such presbyters, may join in the election of a bishop. A convention is composed of the clergy, and a lay delegation, consisting of one or more members from each parish. In every state, the bishop is to be chosen according to such rules as the convention of that state shall ordain. The mode of election in most or all of the states, is by a concurrent vote of the clergy and laity, in convention, each body voting separately. Before a bishop can be consecrated, he must receive a testimonial of approbation from the general convention of the church; or, if that is not in session, from a majority of the standing committee in the several dioceses. The mode of consecrating bishops and ordaining priests and deacons, differs not essentially from the practice in England.

1. *To be born*, is to be produced or brought into life. "Man is *born* to trouble." A man *born* a prince or a beggar. It is followed by *of* before the mother or ancestors.

برج *burachon*; Sans. *bura*. This word, in Saxon, is interpreted a hill, heap, mountain, fortification, castle, tower, city, house, and tomb. Hence *Perga* in Pamphylia, *Bergen* in Norway, *Burgos* in Spain, and probably *Prague* in Bohemia. In W. *bwr*, *bwrs*, signifies a wall, rampart, or work for defense, and *berdaas* is a burgess. But the original sense probably is found in the verb Sax. *beorgan*, D. and G. *bergen*, Russ. *beregu*, to keep, or save, that is, to make close or secure. Hence it coincides with *park*, and L. *parcus*, saving. (See the next word.) If the noun is the primary word, denoting *hill*, this is from throwing together, collecting, a sense allied to that of making fast or close.]

Originally, a fortified city or town; hence, a hill, for hills were selected for places of defense. But in later times, the term *city* was substituted to denote an episcopal town, in which was the see of a bishop, and that of *borough* was retained for the rest. *At present*, the name is given appropriately to such towns and villages as send representatives or burgesses to parliament. Some boroughs are incorporated, others are not. *Blackstone. Encyc.*

In *Connecticut*, this word, *borough*, is used for a town, or a part of a town, or a village, incorporated with certain privileges, distinct from those of other towns and of cities.

In Scotland, a *borough* is a body corporate, consisting of the inhabitants of a certain district, erected by the sovereign, with a certain jurisdiction. Boroughs are erected to be held of the sovereign, as is generally the case of royal boroughs; or of the superior of the lands included, as in the case of boroughs of regality and barony. Royal boroughs are generally erected for the advantage of trade. *Encyc.*

See the preceding word.]

In *Saxon times*, a main pledge, or association of men, who were sureties or *free* pledges to the king for the good behavior of each other, and if any of fense was committed in their district, they were bound to have the offender forthcoming. The association of ten men was called a *tithing* or *decenary*; the presiding man was called the *tithing-man* or *head borough*: or, in some places, *borsholder*, *borough's elder* This society was called, also, *friburg*, free-burg, frank-pledge. Ten tithings formed a *hundred*, consisting of that number of sureties, and this denomination is still given to the districts comprehended in the association. The term seems to have been used both for the society and for each surety. The word *manx*, hand, which is attached to this society, or their mutual assurance, indicates that the agreement was ratified by shaking hands.

Spelman. Blackstone. Cowel.

Some writers have suggested that the application of this word to towns sprung from these associations, and of course was posterior to them in time. [See *Encyc.*, art. *Borough*.] But the word was used for a town or castle in other nations, and in Asia, doubtless long before the origin of the *frank-pledge*.

In G. *beutel*, a bag, a purse, seems to be the Sp. *botilla*. In Fr. *botte* is a boot, a bunch, or bundle, *botte de foin*, a bottle of hay. It would seem that *bottle* is primarily a bag, and from the sense of swelling, bulging, or collecting into a bunch; if so, the word was originally applied to the bags of skins used as bottles in Asia. Yet the primary sense is not easily ascertained. The Arabic has بط *batta*, a duck, Sp. *pato*, and "urceus cornaceus in quo liquidiora circumferunt viatores." *Cast.*]

The tackle of the ship, also, is answerable for the debt, as well as the person of the borrower. 1. A limit; the line which comprehends the whole of any given object or space. It differs from *boundary*. See the latter.

2. As *a participle*, or perhaps more properly *an adjective*, destined, tending; going, or intending to go, with *to* or *for*; as, a ship is *bound to* Cadiz, or *for* Cadiz.

The application of this word, in this use, is taken from the orders given for the government of the voyage, implying obligation, or from tending, stretching. So *destined* implies *being bound*.

Bound is used in composition, as in *ice bound*, *wind-bound*, when a ship is confined or prevented from sailing by ice or by contrary winds.

BOUND'A-RY, *n.* A limit; a bound. *Johnson.*

This word is thus used as synonymous with *bound*. But the real sense is, a visible mark designating a limit. *Bound* is the limit itself, or furthest point of extension, and may be an imaginary line; but *boundary* is the thing which ascertains the limit; *terminus*, not *finis*. Thus, by a statute of Connecticut, it is enacted, That the inhabitants of every town shall procure its *bounds* to be set out by such marks and *boundaries* as may be a plain direction for the future; which marks and *boundaries* shall be a great heap of stones or a ditch of six feet long, &c. This distinction is observed also in the statute of Massachusetts. But the two words are, in ordinary use, confounded.

1. Liberality in bestowing gifts and favors; generosity; munificence. The word includes the gift or favor, and the kindness of disposition with which it is bestowed, or a favor bestowed with a benevolent disposition. This distinguishes it from a mere gift. It is also observed by Johnson, that it differs from *charity*, as a *present* from an *alms*, in not being bestowed upon persons absolutely necessitous. This is often the case; but *bounty* includes *charity*, as the genus comprehends the species; *charity*, however, does not necessarily include *bounty*, for *charity*, or an *alms*, may be given with reluctance.

The word may be used also for a free gift. 2 Cor. ix. 5, or a disposition to give, without the gift, goodness in general. *Spenser.*

Syr. and Eth. ברר, to shine, or more probably, Eth. ⋂Ⅽ⅄ *bareah*, to shine, as the Eth. participle ⋂Ⅽ⅄Ⅾ *berht* or *bereht*, corresponds exactly with the Saxon. I have not found this word in any other Teutonic or Gothic language, and the original verb is lost in the Saxon. In Saxon, *beorh tharle* or *brihthwile* signifies a moment, the twinkling of an eye. This directs us to the primary sense of the verb, to shine, which is, to shoot, to dart, to glance. That this is the primary sense, we have evidence from the Sax. *brychtm*, which is a derivative from *bryht*, and which signifies a *moment*, that is, the time of a shoot, or darting, like *glance*.]
